
Detach Problem

Posted by MrCat - 2006/10/05 02:15

A little issue thats bugging me.

I got standard windows pop-up blocker on. I like it cause normally when there is a pop i get asked if I want to allow it to pop up.. Now when I click join chat a script box pops up saying "Your pop-up blocker is blocking the chat window blah blah " okie, so I click ok.. the minute i click ok the top bar where i disable the popup blocker for this site disappears so I can't disable it.

Is this IE / FireFox problem or something with BlastChat???

Excellent . . . I too am awaiting this small but useful change.

Thanks for the excellent service!

Ken
