
Modul and PonyGallery won't work :-)

Posted by flatcoated - 2007/08/29 01:09

I install the Module but now i see, that this module won't work with PonyGallery. If a user got to PonyGallery and also the Chat Module is active, the other modules behind BlastChat Module doesn't load :-)

Example see at <http://www.after-work.at> select Fotogalerie and see there isn't a module behind the chatmodule

Hope all people understand my poor english and somebody have idea to help with this

I have checked your website and I can see all modules loaded correctly. I am using FireFox, which browser do you use?

(BlastChat module has been tested with most browsers with no visible problems.)
