## Can't access Room Admin page.

Posted by Looku - 2008/02/13 14:27

---

I set myself to SuperAdmin, and then I changed the room to Moderated and now I can't access the Configuration for my Rooms or site. I click on the Configuration link and nothing happens. Any help would be great. Need to admin my site.

Go to [www.blastchat.com](http://www.blastchat.com) and click "Your registration"  
(Upcoming client 2.3 will have joomla admin backend configuration fixes)

What is your browser? And are you getting any error message or just blank page?

(Clear cache?)

---

I'm using IE 7 (Work makes me) and the page doesn't give an error anything. Just never loads. Looks like it is really trying to, but never makes it to the page.

Alright sat still and let it work itself all the way through and came back with the following error

Parse error: syntax error, unexpected \$end in /home/apps/httpd-2.2.6/htdocs/components/com\_bcaccount/bcaccount.php on line 133

---

## Re:Can't access Room Admin page.

---

You got that because I just uploaded adjusted bcaccount.php file to server. Please, try again.

---

Alright deleted everything Temporary from IE7 and tried to go back to My Administration page and it still just hangs.

---

## Re:Can't access Room Admin page.

---

last test:

1. logout from blastchat.com
2. clear cache
3. clear cookies
4. close IE
5. open new IE
6. go to www.blastchat.com
7. login
8. click "Your registration"

Did all those steps, was working in IE7 before and after the same.

Sorry to take up all your time, but that was freaking me out. Clearing everything and then shutting down seemed to do the job. Everything seems to be good now. Thanks.
