
Module profile ItemID # not linking correctly

Posted by Veronis - 2008/03/11 15:27

See screen shot below for current configuration; I have set ItemID to 53 (correct value) but when the module creates the link to SMF profile, ItemID is set to 1; e.g. http://www..com/index.php?option=com_smf&action=profile&Itemid=1&u=2509

Could I have configured something incorrectly?

Screen shot attached. http://www.blastchat.com/images/fbfiles/files/itemid_53.zip

Change "Attach Itemid" from "Yes" to "Use Itemid option defined below"
("Yes" attaches current Itemid, not the one defined below)

What a newbie mistake. I didn't even notice that option.
