## room creation Joomla 1,5

Posted by michel22 - 2008/04/04 20:55

---

How do I create rooms. I tried via the front end and back end, nothing works! Cant find the button to create a room.

would appreciate some help

---

1. go to your joomla admin backend
2. select menu Components-BlastChat client-Configuration
3. scroll down and find Server side Configuration area (login to you blastchat account inside frame)
4. click on your website name in this frame
5. Click "Rooms" icon
6. click "New" icon

or

1. go to [www.blastchat.com](http://www.blastchat.com) and login to your blastchat account
  2. click "Your registration" menu
  3. click on your website name in this frame
  4. Click "Rooms" icon
  5. click "New" icon
