
\ "Join chat" link

Posted by t4uru5 - 2008/04/09 04:01

Hi, where can I change the link for the 'Join chat' link in the Blastchat module?

I think you'll need to be more specific, but I'll make an attempt:

From within the Joomla or Mambo module editor. Log in as an admin to Joomla or Mambo and select modules (list all modules installed). Edit the BlastChat module and in those settings, there's an option to change the link displayed for users listed.

I think you are talking about translating "Join chat" link within module, if so then language files are under blastchatc component

joomla\root\components\com_blastchatc\languages

Default language is english and definition is

```
if (!defined("_BC_JOINCHAT")) DEFINE("_BC_JOINCHAT", "Join chat");
```

Create new language file if you can not find yours or adjust one you are using (it might be missing translation).

If you want to change how "Join chat" link is presented then adjust code itself in dynamic.blastchatc.php file around line 459 you will find code

```
$content .= mosToolTip( $usertext, "BlastChat "._BC_GLOBALSTATUS."  
www.blastchat.com", $bc_params->tooltip, "", _BC_JOINCHAT, $chlink );
```

Actually, I want the 'Join chat' link to be linked to the menu link of BlastChat instead of the module link of BlastChat.

This is because the menu link for Blast Chat allows for my right module to appear on the right when BlastChat loads whereas the module link for BlastChat loads Blastchat without all my other my right modules.

Unfortunately, I made mistake in implementation not thinking of this option.

This will attach Itemid to emoticon and username link in module:

1. Find out what is "Itemid" value of your "Join chat" menu item on frontpage
2. Go to BlastChat module config
3. Set "Attach Itemid" to "User Itemid option defined below"
4. Set "Chat Itemid" option to value you got from step 1.

To attach Itemid to a "Join chat" link inside module you have to adjust dynamic.blastchatc.php file, around line 447 find:

```
$chlink .= bc_getItemid($bc_params, $Itemid);  
and change it to  
$chlink .= bc_getItemid($bc_params, $Itemid, 0);
```

OR find function:

```
//type - 0 chat, 1 profile  
function bc_getItemid($bc_params, $Itemid, $type=-1) {  
    $chatlink = "";  
    if ($bc_params->currentitemid == 1) {  
        $chatlink .= "&Itemid=".$Itemid;  
    } elseif ($bc_params->currentitemid == 2) {  
        if ($type == 1) {  
            $chatlink .= "&Itemid=".$bc_params->bc_itemidp;  
        } elseif ($type == 0) {  
            $chatlink .= "&Itemid=".$bc_params->bc_itemid;  
        }  
    }  
    return $chatlink;  
}
```

and replace it with:

```
//type - 0 chat, 1 profile  
function bc_getItemid($bc_params, $Itemid, $type=-1) {  
    $chatlink = "";  
    if ($bc_params->currentitemid == 1) {  
        $chatlink .= "&Itemid=".$Itemid;  
    } elseif ($bc_params->currentitemid == 2) {  
        if ($type == 1) {  
            $chatlink .= "&Itemid=".$bc_params->bc_itemidp;  
        } else {  
            $chatlink .= "&Itemid=".$bc_params->bc_itemid;  
        }  
    }  
    return $chatlink;  
}
```

Re: "Join chat" link

Code:

```
$chlink .= bc_getItemid($bc_params, $Itemid);  
and change it to
```

Code:

```
$chlink .= bc_getItemid($bc_params, $Itemid, 0);
```

Ok, I did the above, so I do not need to do the third part?

Also, when I tried to disable tooltip by entering 0 for the Tooltip Width value, the tooltip is still there in the homepage.

Must the user have an account in my Joomla database for me to be able to give priviledge?

Apart from the above, I previously registered an account here but it keeps saying I have got the wrong username entered. Can you please check for me and let me know how I can change change the registered account to this email instead?

Username: j45on

Email: ***

Remember, it is always best practice to submit new topic if new/unrelated question/problem is being submitted.

t4uru5 wrote:

Ok, I did the above, so I do not need to do the third part?Correct.

Also, when I tried to disable tooltip by entering 0 for the Tooltip Width value, the tooltip is still there in the homepage.Read topic module tooltip setting

Must the user have an account in my Joomla database for me to be able to give privilege?Yes, and that user must enter chat from your website's frontend

Apart from the above, I previously registered an account here but it keeps saying I have got the wrong username entered. Can you please check for me and let me know how I can change change the registered account to this email isntead?There is no BlastChat account with username "j45on". (For personal things like this it is best to contact us using "Contact us" form.)
