thanks for your quick reply and such a great component.  
Finally one more question, how then do I get rid of the baaners than keeps on popping up as I don't want to do any advertisement as of now yet.

In joomla admin backend explore, menu Components -> BlastChat client -> Configuration -> "Server side Configuration" -> "Config" area, "No ads" option

(Take a look at "Banners" area as well if you want to show your own banners or ads)
